Kumon is a global educational program designed to help children develop their mathematical and reading skills through a personalized learning approach. Founded in Japan in 1958 by Toru Kumon, the program emphasizes self-paced learning, allowing students to progress according to their individual abilities rather than a standard classroom pace. The core philosophy of Kumon is to cultivate independent learning skills, critical thinking, and a love for learning.

In the Kumon program, students engage with worksheets that gradually increase in difficulty. Each level is meticulously designed to ensure that concepts are mastered before advancing.
